Introduction . . .

Plantation window shutters are probably the most stylish, elegant, practical and desirable, interior window covering solution available.

Able to give an older property a contemporary twist or a more modern home added character, shutters are a highly versatile window dressing.

By combining a shutter style with one of the many options available such as the number of panels, the louvre size, shutter colour, hinge type and control method, your shutters will be unique to you.

Bespoke shutters at amazingly affordable prices.

Our Beliefs & Ethics . . .

As a business, ethics are incredibly important to us and so, we act with transparency at every level with our suppliers, our staff and our customers.

The hardwood we use to make our shutters is graded by the Forest Stewardship Council (FSC) is sourced responsibly and is ecologically sustainable.

Both SGS and Impactt make the appropriate checks that ensure our production lines and facilities always operate ethically.

In a nutshell, we care about our methods, people and our environment.

Expectations . . .

When you choose **buzzard** shutters as your shutter supplier, you can expect excellent quality products, guaranteed for three years.

You'll also receive a professional and fully transparent service with exceptional service levels.

Every member of our team is happy to go the extra mile to ensure our customers are completely satisfied; we value your custom highly.

Extraordinary service and quality are our standard

Shutter Styles . . .

There are three main shutter styles to select from, these are, full height, half height and tier on tier, each of them is available in a selection of louvre sizes, colours and with hidden or visible, tilt controls.

Beyond these basic options, there are a multitude of choices to make. Our experienced designers will show you samples and spend time with you describing each option and listening to what you want from your shutters.

We're here to help so don't worry, we'll help you every step of the way.

Full Height . . .

The full height window shutter is our biggest seller.

Classic lines with lots of options to select from such as a classic mid rail that allows the top and bottom halves to operate independently, concealed or visible tilt controls at no extra cost and many more.

This style covers the entire window from the cill or floor, upwards. Our full height shutters are really popular and with good reason, available in solid wooden panels, in all louvre sizes, paint colours and stains.

Café Style . . .

These are traditional but ultra chic, window shutters.

Usually around half the height of a window, cafe style shutters allow top level light to flood into your room, whilst providing privacy from the lower half. Ideal for curb side privacy and rooms not overlooked from above.

They are super stylish and suit period homes, as well as modern clean and linear applications.

One of the major benefits is that they are smaller as they don't cover the whole window, so they do come in a little more cost effectively than a full height shutter.

All of the chic style for less, beautiful!

Tier on Tier . . .

These stylish double layer shutters, feature separate top and lower sections.

Tier on Tier shutters give greater control over your light and privacy. They allow the top to be opened separately from the bottom, giving extra, light and privacy control.

They are ideal for period properties, such as Victorian or Georgian homes with sash windows, lending a classic yet functional feel to the facade of a building. We don't recommend them for windows that are wider than they are high though.

We love these and many of our customers do too!

Bay Windows . . .

Shutters, fitted to a bay, help to make the most of the space you have.

Three sided square or angled Victorian, multiple angle or half round with five, six or seven panels, shutters can be made to fit any bay.

Choose from full height or tier on tier shutters to cover the whole of the bay or opt for café style if you want to see the world over your shutters or add another window dressing to the top or .

Nothing else comes close to shutters in a bay window.

Bi-Fold & Patio Doors . . .

Our large opening solutions include bi-fold and tracked shutter options.

Bi-Fold shutters are ideal where there are an odd number of panels needed as we can hang up to three shutters together on each side of the opening.

Tracked shutters fold back along a track fitted to window reveal and are guided by a floor track. There has to be an even number of panels and the shutters will open at right angles into the room.

Blackout option . . .

When you need to make a room dark, really dark, even in bright sunlight, we have a fantastic solution.

We can fit your shutters to the edge of the window with a blackout roller blind, behind. You'll achieve up to 95% darkness, even on the brightest day with this option.

There is a second but more costly option available that uses a special shutter frame with an integrated blind and side tracks, this cuts light transmission by 100%

Great for night workers, babies and light sensitive people.

Special Shapes . . .

Special shapes shutters are, like all of our shutters, custom-made and designed to fit your opening perfectly.

We can design and fit, shape and size, even for the most difficult windows. Round, angled or curved shutters are all available in 100% FSC Basswood.

Ultimately your taste, the practicality and your budget will influence which style you choose.

Special shapers are more expensive to make and to fit than standard windows

Materials & Colours . . .

When making shutters, the quality of the materials matters and that's why we don't offer MDF shutters. Instead we use 100% FSC hardwood for our shutters.

Our Paulownia wood is ecologically and ethically sourced and happily, costs about the same as MDF.

With several dozen standard paint colours as well many wood stains to choose from, you'll almost certainly find one or more, that you like. If not, we can colour match at extra cost, to any colour in the world. Yes, really, any colour at all.
